## **Domestic Violence Emergency Hotline March 2023 Data and Analysis Report**

The Domestic Violence Emergency Hotline, operated by the Federation of Women Associations of Turkiye (TKDF), received a total of 513 calls between March 1-31. 55 of these calls came from Istanbul. Istanbul was followed by Ankara with 33 calls and Antalya with 14 calls. Apart from these provinces, calls were received from 38 different provinces. These provinces are listed as follows: Adana:8, Adıyaman:4, Ağrı:1, Aydın:12, Balıkesir:3, Bolu:5, Bursa:4, Çanakkale:2, Çorum:2, Denizli:1, Diyarbakır:1, Edirne: 1, Elazığ:1, Eskişehir:1, Hatay:12, Mersin:8, İzmir:12, Kars:3, Kayseri:1, Kırklareli:1, Kocaeli:4, Konya:1, Malatya:1, Manisa:1, Muğla:1, Sakarya:3, Sinop:1, Sivas:6, Trabzon:1, Tunceli:1, Şanlıurfa:2, Şırnak:1, Van:2, Bartın:3, Ardahan:1, Osmaniye:1, Düzce: 1, Karaman:1.

The distribution of the calls by districts in the province of Istanbul, where the highest number of calls came, was as follows: Çekmeköy: 2, Kadıköy: 2, Kartal: 1, Maltepe: 1, Pendik:3, Sancaktepe:3, Sultanbeyli:2, Üsküdar: 6, Tuzla:1 , Bahçelievler: 1, Beyoğlu: 2, Esenyurt: 5, Eyüp: 1, Gaziosmanpaşa: 1, Kâğıthane:1, Küçükçekmece: 1, Sultangazi:1, Şişli: 5. The distribution of calls between cities and districts shows that the development levels of the cities, Regardless of their socioeconomic status, calls for violence and earthquake help came from different cities and districts.

Earthquakes with a magnitude of 7.7 and 7.6, which occurred at 04.17 in the morning and at 13.24 in the afternoon, on Monday, February 6, 2023, caused great destruction and losses in the Republic of Turkiye and the Syrian Arab Republic. Due to the earthquakes, in the provinces of Gaziantep, Kahramanmaraş, Adıyaman, Hatay, Diyarbakır, Osmaniye, Malatya, Adana, Şanlıurfa and Kilis within the borders of the Republic of Turkey, more than 50,000 people died and more than 107,000 people were injured., Support and assistance was provided via the TKDF Emergency Hotline to the cities in the disaster zone. For this reason, there are also requests for help from earthquake survivors in the March 2023 data.

The number of new cases opened in March 2023 regarding the 6 February earthquakes was 52. The Emergency Hotline responded to 1 missing child case. 19 rental assistance requests were received. 2 calls were forwarded to AFAD, Municipalities and local authorities in the earthquake area.

Since 15 October 2007, the total number of calls to the Domestic Violence Emergency Hotline has been 88,896. Within these calls, notifications from all provinces of Turkiye and from many countries (Germany, France, Austria, Azerbaijan, Belgium, Netherlands, Australia,

United States of America, Syria, Switzerland, Iran, Tunisia, England, Sweden, Romania, Libya, Japan , Ukraine, Georgia, Kenya, Canada, Kazakhstan, Greece, China, United Arab Emirates, Iraq and Cyprus) were received. In March 2023, the Domestic Violence Hotline received 2 calls from Germany.

Of the 167 cases of violence that were reported to the Domestic Violence Emergency Hotline in March and newly registered, 66 were domestic violence reports. 33 of these violence reports are intimate partner violence reports. 12 callers sought shelter. There were 4 cases that required urgent intervention. Legal counsel was provided to 71 callers. 39 calls were referred to the law enforcement and 14 calls to bar associations. The ages of those who were exposed to violence in March ranged from 13 to 72.

Received calls show that the majority of survivors of domestic violence are women (89.4%). This rate is followed by men with 5.9%.

Majority of the reported violence cases are psychological and physical violence cases (43% psychological violence; 29% physical violence). Apart from these types of violence, 13% of the calls were social violence, 10% were sexual violence, and 5% were calls reporting economic violence. It should be noted here that although it is easy to conceptually distinguish between the types of violence when analyzing, this is not so easy in real life. In most cases, many types of violence can take place together, but one or two of them stand out from the other because of their profound effects on the survivor and are voiced by them. At the same time, forms of violence other than physical violence may not be known to the survivors. In addition, even if different types of violence are known, reporting may not be considered as urgent and serious enough to seek help in that regard.

Calls to the emergency hotline show that women are most exposed to violence by the men closest to them. Reports show that violence is perpetrated by the spouses and other family members with whom women share their lives in the home, which we assume is the safest space. Spouses constitute the largest group among aggressors with 54.4%. Spouses are followed by boyfriends with 7.0%. General family, father, elder brother, sister, daughter and sons are stated as perpetrators of violence by survivors or reporters. In March 2023, ex-boyfriends was 5.3% and ex-spouses 3.5% among the perpetrators.
